RE: REACH (EC Regulation on chemicals and their safe use)  
Regulation number 1907/2006 dated 18/12/2006

Dear Sir/ Madam,

According to the current state of ongoing discussions  
within the REACH Competent Authorities,  
we believe that the REACH regulation does not apply to us for the following  
reasons:

- ◆ we transform “polymers” explicitly excluded from the REACH regulation
- ◆ the plastic materials used by us do not contain additives that are intended to be released from the articles under normal or foreseeable conditions of use.
- ◆ we do not import plastic raw materials from outside the EU.
- ◆ the obligation for the REACH registration is in progress by our EU suppliers if necessary

So all the articles we sell you, as all the product on our web site ([www.atpitaly.eu](http://www.atpitaly.eu))  
are made with the polymers over mentioned.

We trust to have informed you hereby sufficiently and  
we remain at your disposal for any info you might require.

Best regards,

atpitaly srl
